Subject: RE: BEAD Coordination on RD Topics

Thanks, Kelly! This is really interesting and I am glad to hear an expert and another expert comment on it 😊. I am curious to see what BEAD recommends to EFED/HED (not sure which division needs this) **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Subject: RE: BEAD Coordination on RD Topics

This is mostly for Kelly, but I thought that others might be interested in the details of what I found since the BEAD coordination on RD topics. (I had read these earlier and forgotten about them!)

Here is the APHIS document from Texas that discuss a **minimum** of two inches for soil incorporation. This is what I discussed in the meeting. Please see p. 12 of PDF. https://www.aphis.usda.gov/plant_health/ea/downloads/acp-tx-ea2009.pdf

Here is an arthropod management test from 2010 (1st attached) that discusses soil incorporation of aldicarb at four inches.

2nd attachment, 2 to 3 inches (label language for Temik at the time)

3rd attachment, 2 to 3 inches (label language for Temik at the time)
